

## RE: OdaStat-G v1.1.0.30

We are pleased to announce a minor update to the OdaStat-G software to address a compatibility issue with displaying the correct "manufacturing date" for OdaLog Type IV instruments manufactured **AFTER** January 1<sup>st</sup> 2015.

This new version of OdaStat-G is backward compatible for all instruments that are already supported by OdaStat-G.

Customers with instruments OTHER than listed above can continue to use the older version of OdaStat-G.

New purchased OdaLog Low Range instruments will begin shipping accompanied by OdaStat-G Version 1.1.0.30 (if purchased together) immediately (1<sup>st</sup> May 2015). If you already own a copy/license of OdaStat-G, you will be able to download the updated version from our website.

We have also modified the OdaService (v1.0.0.26) for use by authorised service centres for service operations; this version is also backward compatible with previously supported instruments.

This latest software update is available now on our website for customer download - <http://www.odalog.com/odalog/softsup.htm>.

Feel free to contact us for further information,

Regards,

*Chris Thomas, Project Manager (Product Development)*

## Release Notes:

OdaStat-G v1.1.0.30

ADDED: Support for extended manufacturing date range on OdaLog Type IV (Low Range) instruments.
